MyEduPort Requirements for Dev

1. Project overview

- Build MyEduPort, a web platform for students (Grade 9–12, Year 10-13) and parents to:
    - Create and maintain an educational portfolio.
    - Get AI-based guidance for US/UK/China university applications (later: other countries).
- Target roles:
    - Student, Parent, (later: Counselor / School admin).

---

2. Core user flows (MVP)

2.1 Authentication & roles

- Email/password login + password reset.
- Optional social login (Google) if easy.
- Role selection at signup: Student / Parent.
- Parent can link to one or more student accounts via invite/unique code.

2.2 Student profile & portfolio

- Profile pages to capture:
    - Personal info (name, grade level, school, target countries, intended major).
    - Academics: yearly grades, GPA, course list (with level: standard/AP/IB/A-Level etc.), standardized tests (SAT, ACT, IELTS, TOEFL, etc.).
    - Extracurricular activities (title, description, role, duration, hours/week, leadership).
    - Awards, competitions, volunteering, work experience, research, arts/sports achievements.
- Document upload & management:
    - Upload certificates, transcripts, test score reports, photos (PDF/JPG/PNG).
    - Tag by category (academics, awards, test scores, etc.).
    - Basic storage limits per plan (for example, 20 files free, more in paid).

2.3 Portfolio dashboard

- Student dashboard showing:
    - Completion status (for example, 60% profile complete).
    - Key sections with “complete / missing” indicators.

- Simple visuals: academic summary, activity count, uploaded documents count.

---

3. AI features (MVP implementation)

You do not need to build ML models now; just integrate with an LLM API (for example, OpenAI/Anthropic) with our prompts and our database.

3.1 Student Profile Strength Score

- Backend service that:
    - Reads structured portfolio data from DB.
    - Calls LLM with system prompt + student data to output:
        - Overall score 0–100.
        - Category scores (Academic, Extracurricular, Achievements, etc.).
        - 3–5 bullet strengths, 3–5 bullet weaknesses.
- Frontend: display as simple cards or bar chart in the dashboard.

3.2 Basic University Recommendations

- Simple form: student selects target country (US/UK/China), intended major, and up to 5 dream schools.
- Backend:
    - Query a university table (we will provide CSV/DB) with fields: country, name, major/subject areas, general selectivity band, typical GPA/scores.
    - Call LLM to categorize suggestions as Reach / Target / Safety based on student profile + simple rules.
- Frontend output:
    - List of 10–15 suggested universities with category, country, and short explanation.

3.3 Simple Gap Analysis (Lite version)

- For MVP:
    - Take profile + intended country/major.
    - LLM returns up to 5 “next recommended actions” (for example, “take one higher-level math,” “add a long-term volunteering activity”).
- Show in a “Next Steps” section with priority labels (High / Medium / Low).

3.4 Basic AI Chatbot (EduBot v1)

- Single chat interface page with:
    - Left side: chat history.

        - Right side: quick buttons (for example, “Ask about US requirements,” “Ask about my profile”).
- Backend:
    - Chat calls LLM API with:
        - System prompt describing MyEduPort role and rules.
        - Student profile summary (pulled from DB).
    - Enforce token and rate limits (for example, X messages per day, more for paid users).

---

4. Data & database requirements

- Suggested stack:
    - Backend: Node.js (NestJS/Express) or Python (Django/FastAPI).
    - Frontend: React/Next.js (responsive, mobile-friendly).
    - DB: PostgreSQL or MySQL.
- Key tables/entities:
    - Users (auth, role, locale).
    - Students (linked to User; grade level, school, countries, intended major).
    - Parents (linked to User).
    - AcademicRecords (year, course, level, grade, school system flag).
    - TestScores (type, date, score, superscore where relevant).
    - Activities (type, title, description, start/end date, hours/week, leadership flag).
    - Awards & Achievements.
    - Documents (file path, category, linked student).
    - AIReports (profile score, date, raw JSON of response).
    - AIChatSessions & AIChatMessages (for context and safety logs).
    - AI Recommendations
    - Universities (name, country, city, selectivity band, typical stats, major tags).

---

5. Plans & payments (basic integration only)

Tier 1: FREE (Starter)

Purpose: Lead generation, demonstrate value, serve budget-conscious families

Features:

- Create basic student profile
- Manual portfolio builder (no AI assistance)
- Access to university database (search only)
- General college prep resources and blog
- Timeline template (not personalized)
- Document storage: 100MB
- Community forum access
- 3 AI chatbot questions (one-time)

Limitations:

- No AI acceptance predictions
- No personalized recommendations
- No gap analysis
- No parent dashboard
- No export/sharing capabilities
- Basic support only (email, 48hr response)

Strategy: Free tier users see "upgrade to unlock" prompts, demonstrating what they're missing

---

Tier 2: ESSENTIAL ($29/month or $290/year)

Target: Grade 10-12/Year 9-12 students who need immediate help, budget-conscious families

Everything in Free, plus:

- Complete AI-powered portfolio builder
- Basic AI acceptance predictions (up to 10 universities)
- University recommendations (Reach/Target/Safety)
- Basic gap analysis (identifies major gaps only)
- Personalized timeline with reminders
- Document storage: 3GB
- 30 AI chatbot queries per month
- Country-specific guides (US, UK, or China - choose one)
- Email support (24hr response)
- Export portfolio as PDF
- Basic analytics dashboard

Annual Savings: $58/year (16% discount)

Why $29/month:

- Psychological pricing ($29 feels significantly less than $30)
- Still affordable for most families (~$1/day)
- Annual option ($290) = cost of 1-2 SAT prep books per month
- Competitive with other ed-tech subscriptions

Tier 3: PROFESSIONAL ($49/month or $490/year)

Target: Serious students (Grade 10-13), families who want comprehensive support

Everything in Essential, plus:

- **Unlimited AI acceptance predictions** (any number of universities)
- **Advanced AI recommendations** with detailed explanations
- Comprehensive gap analysis with impact predictions and improvement roadmap
- AI chatbot: 150 queries/month (5/day average)
- All country guides (US, UK, China, EU access)
- Field-of-study specific guidance (detailed major exploration)
- Essay analyzer with AI feedback (up to 5 essays/month)
- Parent dashboard with progress monitoring
- **Advanced analytics and reports** (monthly progress reports)
- **Competition analysis** (see how you compare to typical admits)
- Document storage: 10GB
- Priority email support (12hr response)
- Live chat support (business hours)
- Video tutorials and webinars (exclusive access)
- **Recommendation letter tracker and templates**

Annual Savings: $98/year (16.6% discount)

Why $49/month:

- Still far below consultant costs ($3,000-15,000)
- Annual option ($490) = cost of one essay editing service
- Positioned as "serious student" tier
- $20 premium over Essential shows significant added value

Tier 4: ELITE ($99/month or $990/year or $1,749/2-year)

Target: High-achieving students targeting top 20 universities, families wanting white-glove service

Everything in Professional, plus:

- Unlimited AI chatbot queries
- Personal success advisor (1 video call per month, 30 min)
- **Essay editing service** (1 professional edit per month, included)
- **Interview preparation** (AI mock interviews + feedback)
- Unlimited essay analysis with detailed AI feedback
- Advanced "What-if" scenario modeling (test impact of improvements)
- Early access to new features
- Custom university research reports (on-demand)
- Document storage: 50GB
- 24/7 priority support (phone, email, chat)
- Dedicated success manager (for 2-year plan)
- **Portfolio review by admission expert** (2x per year)
- Exclusive networking events (virtual with successful students/counselors)
- **College application checklist and deadline management**
- Financial aid and scholarship guidance

Annual Savings: $198/year (16.6% discount) 2-Year Savings: $626 (26% discount)

Why $99/month:

- Anchors lower tiers as "affordable"
- Still 97% cheaper than typical consultant
- Includes human expertise component (video calls, expert reviews)
- 2-year commitment option ($1,749) = $72.87/month (targets Grade 10-11 students)

Family Plan Options

Essential Family: $49/month or $490/year

- 2-3 students
- All Essential features per student
- Shared parent dashboard

- $19 savings per additional student

Professional Family: $89/month or $890/year

- 2-3 students
- All Professional features per student
- Shared parent dashboard
- $49 savings per additional student

Elite Family: $169/month or $1,690/year

- 2-3 students
- All Elite features per student
- Shared success advisor for all students
- $129 savings per additional student

Payment Options and Flexibility

Payment Plans:

1. **Monthly Subscription**
    - Most flexible
    - Cancel anytime
    - No commitment
2. **Annual Subscription**
    - ~17% discount (2 months free)
    - One-time payment
    - Best value for 1-year users
3. 2-Year Plan (Elite only)
    - 26% discount
    - Ideal for Grade 10-11 students
    - Locks in long-term value
    - Monthly or upfront payment option
4. 3-Year Plan (Elite only, Grade 9 students)
    - 35% discount
    - Complete high school journey
    - Payment plan: upfront or quarterly ($455/quarter)

Payment Methods:

- Credit/Debit cards (Visa, Mastercard, Amex)
- PayPal
- Apple Pay / Google Pay
- Bank transfer (for annual/multi-year plans)
- Alipay, WeChat Pay (China)
- Regional payment methods as needed

Billing Transparency:

- Clear refund policy (30-day money-back guarantee)
- No hidden fees
- Cancel anytime (monthly plans)
- Prorated refunds for annual plans (if within 90 days)

---

6. Security, privacy, and admin

- Basic security:
    - HTTPS everywhere.
    - Password hashing, JWT or session-based auth.
    - Role-based access: parents can only see linked students; no cross-student access.
- Privacy:
    - Ability to delete account and all data.
    - Consent checkbox at signup for data processing for guidance and model improvement, as described in your AI section.
- Admin panel:
    - See list of users, students, and usage stats.
    - Manually block/disable accounts.
    - Edit university database entries.

---

7. Phase 1 vs later phases

Ask developer to scope Phase 1 only as:

- Features: sections 2, 3.1–3.4, 4, basic in 5, and minimum in 6.
- Later phase can be developed to iOS and Android app.
- Timeline goal: working MVP in 3–4 months with clean code structure so AI features can be upgraded to your full Acceptance Prediction, Gap Analysis, and Timeline engines later.
-
